# “Healing done to another level.” Shivani Vora, Forbes USA, nov 2021

„Kornelia Schwitzer, founder and CEO of SilberQuarzit, has been working in the wellness industry for over 20 years and developed silberquarzit, a multi-hour experience that’s the most unique treatment I’ve ever had— and believe me, I’ve tried my fair share. Your session with Kornelia begins with her asking your goals when it comes to your mental and physical health. Perhaps you want to sleep better or have personal distress that you’d like to let go of. You relax with incense, and then she works her magic using quartz stones that she finds in the quarry near where she lives. Get ready to experience muscular or emotional reflexes as the quartz interacts with your body. The more intense they are, according to Kornelia, the more likely it is that you’re getting rid of all the blockages holding you back. **This is healing done to another level.**“

# Powerful Alpine Healing meets you in London

My rituals and meditations swiftly and efficiently activate your parasympathetic nervous system which deeply relaxes your body.

Through the **harmonious interplay of incense, healing chants, tree oils, and the profound influence of 150 million-year-old stones from the Alps**, coupled with my healing expertise, you swiftly enter into an extraordinary state akin to a sensation of being weightless.

Within this state, your body undergoes powerful shifts, shedding old programming and embracing transformation.

It's an incredibly powerful experience, inducing a deep meditative state by activating theta waves in the brain while fostering profound bodily relaxation.
